

Meeting Summary

****Key Points****

- The metaverse can enable a parallel life where the virtual intersects with reality, blurring boundaries.
- Virtual face-to-face negotiations may be as effective as in-person ones.
- The metaverse could enhance diplomacy and lead to quicker responses on global issues, such as climate change.
- The metaverse may pose new challenges, including the need for laws and jurisdiction to govern it.

****Decisions****

None explicitly stated.

****Action Items****

None explicitly stated.

****Final Summary****

The meeting discussed the potential of the metaverse to intersect with reality and enhance diplomacy. However, it also highlighted the need for laws and jurisdiction to govern the metaverse, which may pose new challenges. No concrete decisions or action items were established.

Transcript:

SPEAKER_1: In the metaverse, we can live not just a virtual second life, but also a parallel life where

SPEAKER_1: the virtual intersects with reality and the boundaries between the two grow more and more

SPEAKER_1: blurred.

SPEAKER_2: In many ways, it may actually enhance the effectiveness of diplomacy.

SPEAKER_1: virtual face-to-face negotiations may become as effective as in-person ones.

SPEAKER_1: Global summits and indeed side conversations where you can interact

SPEAKER_1: virtually where you can smell the coffee almost can lead to both quicker

SPEAKER_1: responses and actually make a dent in climate change. On the other hand the

SPEAKER_1: metaverse is likely to turn out to be the new Wild West. What laws will

SPEAKER_1: govern it. Who will have jurisdiction and over what? Who will own
